

## Business Rules Sustainability Diagnostic Assessment *If You Have Already Begun Your Business Rules Based Approach*

### Why a Diagnostic Assessment?

Now that you have already begun a Business Rules Based Approach, let us help you evaluate the potential Return-On-Investment a Business Rules approach might provide.

The Business Rules Sustainability Diagnostic Assessment helps you gain the most knowledge from your pilot application or first production system. We will assess in-detail your organization's vision, motivation, goals and readiness for implementing a business rules approach. Your current approaches for both business and technical development will be reviewed. We will examine your system and technology architectures for potential Business Rules integration and review the business and technology requirements for Business Rules management. The assessment will provide recommendations and best practices to improve your environment.

Lambert BRDP constantly monitors the business rules space for best practices, implementation issues, working solutions, and technology changes. One of Lambert BRDP's objectives is to provide an independent focus for this type of assessment to help you enable your business through sustainable business rules.

### Assessment/Review will cover:

1. Target Organization's motivation and readiness
2. Goals and vision for business rules to implement business vision
3. Industry Applicability for BR system and technology architecture and business rules management
4. Cultural readiness for the implementation of a BR project, including current relationship model between IT and business staff for rules stewardship, rules governance, rules management, rules maintenance.
5. Detailed Root cause analysis of the current BR project environment problems and issues
6. Existing Business and IT project development Culture including project management and SDLM
